| **Automation & Dev** | Google Apps Script, JavaScript, HTML/CSS, Node.js, PowerShell, Git/GitHub, Claude and AI agent workflows |
| **Networking** | LAN, DHCP, VPN, DNS, TCP/IP, MDM |

## WORK EXPERIENCE

**Service Desk Analyst III**, Fanatics Betting & Gaming, Dublin — **Aug 2025 - Present**

- Provide global IT support through Jira Service Management for a workforce spread across the US, UK and Ireland, covering access requests and account provisioning (Okta, GitHub, Azure, GCP, Snowflake, 1Password, Twingate), onboarding, offboarding, escalations and Mac/Windows troubleshooting.
- Act as the local IT contact for the Dublin office, help coordinate on call coverage and prepared the desk for the mandatory rollout of 2 step verification on Google Cloud accounts.
- Built an internal tool in Google Apps Script that generates the full set of new hire access tickets (around 23 per hire) from a single New Hire request. The routing rules behind it came from a review of around 1,600 historical tickets, and the tool has a safe test mode plus several checks before anything is written to Jira. Signed off for production in July 2026 and now usable by any tech on the desk.
- Built a status dashboard that monitors 81 vendor status pages and alerts the team when services go down. Over a multi week side by side trial it matched the incident coverage of the paid monitoring service the team was using, typically alerting within minutes, and caught several outages the paid tool missed. The subscription is now set to be cancelled.
- Developed the FBG Automation Hub, an internal web app for the desk with morning triage, ticket QA and live team dashboards showing resolved totals, per analyst averages and a queue of unassigned quick wins. Dozens of versioned releases to date, with code managed on GitHub behind protected branches and a build and verification pipeline, and presented to the wider team at a company offsite.
- Wrote and shared automation tools with the rest of the desk, including a ticket auditing tool and an access request triage assistant, and worked with Platform Engineering to distribute them to other techs through a shared catalogue.
- Co driving a full cleanup of the roughly 700 page service desk knowledge base with a colleague: co drafted its metadata template with a proposed 90 day review cycle, personally reviewed over 100 internal wiki pages, and wrote 19 internal guides and runbooks.
- Compared the Denver and London new hire training programmes and produced a gap analysis (missing compliance sessions, obsolete material) used to standardise onboarding across sites.
- Run a number of scheduled automations for day to day desk hygiene, such as weekly handover accuracy checks, customer replies landing after ticket resolution and missing ticket priorities.
- Mentor a London based analyst, including a ticket tracker and a QA scoring system adapted from the official Global IT Service Desk scorecard.

**IT Support Analyst**, An Garda Síochána (Vantage Resources), Dublin — **Sep 2023 - Aug 2025**

- Delivered first line support, both remote and on site, across Windows, Office 365 and mobile devices in a high pressure law enforcement environment.
- Managed user accounts, mailbox permissions and groups via Microsoft 365 Admin Centre and Active Directory, including template accounts and GPOs.

- Supported virtual environments (RDP, VMware Horizon) and police specific systems such as body worn cameras, CCTV, secure databases and field radios.
- Troubleshot network issues using ping, traceroute and nslookup, configured firewalls, VPNs and TCP/IP settings, and used PowerShell for Windows tasks.
- Installed and configured law enforcement software across machines and networks, and trained end users under high pressure conditions.
- Collaborated with cross functional teams and vendors to implement updates and resolve incidents, and managed file shares, access permissions, remote printing and OS and application patching.
- Documented IT workflows and troubleshooting processes for knowledge sharing and compliance.

**Software Product Specialist**, Servaplex Ltd. **Sep 2022 - Sep 2023**

- Acted as specialist for ManageEngine OpManager (network monitoring) and PAM360 (privileged access management). Certified OpManager Specialist.
- Delivered pre-sales demos and technical overviews to prospective clients and ongoing technical support for the ManageEngine suite, implementing solutions on client machines and networks.
- Installed and maintained operating systems and software across company computers and managed the company website.
- Applied ITIL, SIEM, ITOM and PAM concepts in daily business operations.

**Support Helpdesk Analyst**, OpenSky Data Systems **Apr 2022 - Sep 2022**

- Logged and managed support tickets to SLA targets, supported Office 365 (Outlook, Teams, OneDrive) and handled account setups via Microsoft 365 Admin Centre.
- Delivered on site IT support to the Ukrainian Citywest Temporary Accommodation Team (UCTAT), and installed operating systems and software across company devices.

**Technical Support Assistant**, LaptopLab **Nov 2016 - May 2017**

- Hardware repair, malware removal with a 100% success rate, system builds and inventory management in a customer facing retail repair shop.

## EDUCATION

**Professional Academy Diploma in Cybersecurity (Distinction)**, UCD Professional Academy **May - Sep 2026**

**BSc in Computing (Distinction)**, National College of Ireland **2018 - 2023**

**Honours Leaving Certificate**, St. Vincent's CBS, Glasnevin, Dublin **2012 - 2018**

## CERTIFICATIONS & ADDITIONAL

- Certified OpManager Specialist (ManageEngine), CompTIA A+ (in progress)
- Fluent in English and Portuguese, full clean driver’s licence (B/BW)
